## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

## DETAILED ACTION

### *Specification*

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, ***"The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.***

The abstract of the disclosure is objected to because of the use of the phrase "is (are also) disclosed" on lines 2 and 8. Correction is required. See MPEP § 608.01(b).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 3671

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mason '741 in view of Orman et al. '738. Mason discloses an apparatus for processing sugar cane (figures 1-27), the apparatus including a treatment process (as seen in figure 5), the process having pressurized spray nozzles 47 for dispensing fluids to the cane. Further, Mason shows (as seen in figures 5 and 6) the fluid being dispensed while the cane passes through chutes 5 but fails to show the fluid being a biocide. However, Orman teaches that it is well known to treat such crops with such a biocide (figures 1-3). Further, Orman teaches the various pumps, nozzles and controllers which are employed in concert (as seen in figures 2 and 3) with such a device. It would have been obvious to one having ordinary skill in the art at the time of the invention to provide the device of Mason with the teachings of Orman to provide a cane harvester having greater operational range.
